

# Puzzle of the Week

## *Magic Triangles – 1*

The sums of the sides of a *Magic Triangle* are all the same. This example is **NOT** a Magic Triangle.

**THE CHALLENGE:** Use the numbers from 1 to 6 to make a Magic Triangle below.

1      2      3      4      5      6

**EXPLORATION:** What are the different sums that are possible for Magic Triangles that use 1 to 6?
