

Puzzle of the Week

Treasure Map – 2

When moving from a square in a treasure map, you must move exactly the given number of squares, and you can only move to the right, left, up, or down.

Here is one way to solve this example of a treasure map.

THE CHALLENGE: Find a route to move the Sun in the upper lefthand corner to the Rainbow treasure in the lower righthand corner of this treasure map.

EXPLORATION: Make treasure maps for others to solve. Can you make them with only one route to the treasure?
