

# Puzzle of the Week

## *Crossing the Moat*

**THE CHALLENGE:** You are trying to break into a rectangular castle that has a very deep and dangerous moat with rigid sides that is 8 meters wide all around it. Through a miscalculation, you have two very strong boards that are each 20 centimeters wide by 775 centimeters long. You have no nails or any other way to attach or tie the boards to each other. How can you use the boards to walk across the moat?

The moat is 8 meters wide.

The boards are 20cm by 775cm
